

# Are you at risk of Hepatitis?

HEP C  
Treatment is  
changing.  
Ask us how!

**Did you know that at our Richmond House site you can be tested, and treated for HEP C and B? You can also be vaccinated for HEP B if you are at risk.**

If diagnosed with HEP C, our Specialist Hepatitis Nurse, Mags O'Sullivan, will assess your liver function (bloods, fibroscan, ultrasound), and deliver treatment from Richmond House. New treatments are available, which are shorter and more effective than what was available previously.

**Come forward and access this life saving service!**

**Call Mags on 07768 355 937 or
